Project Initialization and Planning Phase

Date	02 October 2026
Team ID	SWTID-2026-3981
Project Name	EduGenie-AI Google Gemini Powered Learning Assistant
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

I am (Customer)	A student who wants to learn academic topics quickly and clearly.
I'm trying to	Understand complex concepts, get answers to questions, generate quizzes, summarize study material, and follow a structured learning path.
But	Learning resources are often scattered, explanations may be difficult to understand, and students may spend a lot of time finding suitable study material.
Because	Students have different learning levels and need simple, personalized, and easily accessible educational support.
Which makes me feel	Confused, frustrated, and less confident while studying independently.

PS-1: A student needs an AI-powered learning assistant to simplify complex concepts, answer questions, generate quizzes, summarize content, and provide personalized learning recommendations.
