Project Executable Files

Date	02 October 2026
Team ID	SWTID-2026-3981
Project Name	EduGenie – Google Gemini Powered Learning Assistant
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA (Stateless setup)
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	NA
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
/edugenie-project-root
│
├── /app
│   ├── /routers
│   │   ├── qa.py              # Handles /qa and /explain endpoints
│   │   ├── quiz.py            # Handles /quiz endpoint
│   │   ├── summarize.py       # Handles /summarize endpoint
│   │   └── roadmap.py         # Handles /learn/recommendations endpoint
│   ├── /services
│   │   ├── gemini_service.py      # Google Gemini 1.5 Pro API Integration
│   │   └── local_model_service.py # LaMini-Flan-T5 local offline fallback engine
│   ├── /templates
│   │   └── index.html         # Jinja2 Frontend Dashboard
│   └── /static
│       ├── css/style.css      # Styling stylesheet
│       └── js/main.js         # UI interaction logic
│
├── main.py                    # FastAPI Application Entrypoint
├── requirements.txt           # Python Dependencies
├── .env.example               # Environment Variables Template
├── Dockerfile                 # Container Deployment Config
├── README.md                  # Complete Setup and Execution Guide
└── /tests
    └── test_endpoints.py      # API Endpoint Unit Test suite
```

Step 3: Deployment / Access Details

Field	**Details**
Hosted / Deployed URL	http://127.0.0.1:8000

Login Credentials (Demo)	https://myskillwallet.ai/login
Platform / Hosting Provider	Local Uvicorn ASGI Server
Repository Link	https://github.com/suresh2006-del/EduGenie-AI.git
Demo Video Link	https://drive.google.com/file/d/1-Vk3pcmLwA4-U7VRLZOCZs04bnWFNSrW/view?usp=drivesdk

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites:

Operating System: macOS, Linux, or Windows

Python: Version 3.10 or higher

API Key: Valid Google Gemini API Key

Package Manager: pip

Step 1: [Clone the repository: git clone https://github.com/suresh2006-del/EduGenie-AI.git]

Step 2: [Install dependencies: pip install -r requirements.txt]

Step 3: [Configure environment:GEMINI_API_KEY="AQ.Ab8RN6IzBASX9Lki8kIevSIu-W_1_53R4Ju99c_uHTc9mhXwjg"]

Step 4: [Not Applicable - FastAPI application uses lightweight in-memory processing and requires no database migrations]

Step 5: [Start the application: uvicorn main:app --reload]

Step 6: [Open browser at http://127.0.0.1:8000]

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Large Hugging Face model download (MBZUAI/LaMini-Flan-T5-783M) on first startup.	Initial execution takes longer to download weights; subsequent runs use cached local weights.
2	Gemini API quota or rate limits during frequent requests.	Managed by exception handling in backend endpoints to output clean user messages.
3	Occasional non-JSON responses from LLM when generating quizzes.	Mitigated using clean_json_block utility function to strip markdown fences.
